Clinical Director: **Prof Sofia Aroca**

9 training meetings of two days each

The **Postgraduate Course on Reconstructive Surgery around Teeth and Implants** is offered by the International Academy for Soft Tissue Management around Teeth and Implants with 26K Center for Continuing Education.

Professor Massimo de Sanctis is the scientific responsible of the Course as well as the main teacher.

The **objective of the Course** is to provide the Participants with the **most updated information on reconstructive surgical techniques both for soft and hard tissues.**

All the clinical sessions will be conducted by the best Experts on the specific technique.

Every session of the Course will include a Live Surgery session and will be supported by videos of every single technique as well as hands-on Seminars in order to replicate the surgeries discussed on animal models. During the Course, articles and abstracts of the most recent literature will be delivered to have a more objective discussion maintaining the entire Course based on scientific evidence.

This Course is a unique occasion to refine the surgical skill of participants as well as their capacity of treatment planning and choosing the better surgery in a given case.

After completing the Course and passing the final examination, participants will be awarded a **Diploma in Reconstructive Surgery of Periodontal and Peri-implant Tissues.**
